Supported matters**Statement 1****Statement ID**

c04ea4a2-14ab-5783-b756-23da9875cd41

Category

supported

Text

The mapped employer evidence contains factual material relevant to this element; M4 does not promote the raw excerpt itself into an established proposition.

Evidence keys

- shared-event

Citations

Evidence 1 — shared-event

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- The mapped evidence does not fully resolve: What disability-related condition, symptoms, functional effects or other relevant information existed at the material time?

Legal significance

Evidence of the condition, symptoms, functional effects or disability-related information defines the subject matter that could potentially have been known by the employer.

Frozen provisional analysis

The frozen evidential record provides partial factual support relevant to the content of the disability-related information existing at the material time, but material limitations remain. The current record may identify what health or functional information existed without assuming that CACI received it. The existence of medical or claimant information does not itself establish employer receipt or knowledge.

low

Label

Low

Explanation

Confidence is the frozen analytical confidence ceiling recorded by the engine. It is not a probability of legal success, a probability that a fact is true, or a source-credibility score.

Qualification code

confidence:low

Established matters

None recorded in the frozen report projection.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: Who within the employer is shown to have received, discussed or had access to relevant information, and in what capacity?
- The identified material evidential gap remains unresolved on the current mapped record.

Legal significance

Evidence identifying a recipient, acknowledgement, discussion or access route is relevant to who within the employer may have received particular information.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of which CACI personnel received or discussed relevant disability-related information. The current record may support provisional identification of recipients where communications or acknowledgements are actually documented. Container ownership, general organisational access or involvement alone does not establish that a named decision-maker received particular information.

Linked direct finding IDs

Not recorded in the frozen report projection.

Linked higher-order finding IDs

Element ID

EK-DIRECT-KNOWLEDGE

Element name

Direct evidence of knowledge

Legal question

What contemporaneous evidence directly records receipt, acknowledgement, discussion or awareness of relevant disability information?

Analysis status**Raw value**

insufficiently_evidenced

Label

Insufficiently Evidenced

Explanation

The frozen element state remains insufficiently evidenced.

Qualification code

element_status:insufficiently_evidenced

Analysis confidence**Raw value**

low

Label

Low

Explanation

Confidence is the frozen analytical confidence ceiling recorded by the engine. It is not a probability of legal success, a probability that a fact is true, or a source-credibility score.

Qualification code

confidence:low

Established matters

None recorded in the frozen report projection.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: What contemporaneous evidence directly records receipt, acknowledgement, discussion or awareness of relevant disability information?
- The identified material evidential gap remains unresolved on the current mapped record.

Legal significance

Direct receipt, acknowledgement, reply or discussion is relevant to the factual basis for actual employer knowledge.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the factual basis for direct or actual employer knowledge. The current record may support an argument about actual awareness to the extent that it documents specific information being received, acknowledged or discussed. General participation in rehabilitation or awareness of sickness does not by itself establish receipt of a specific diagnosis or recommendation.

Linked direct finding IDs

Element ID

EK-CONSTRUCTIVE-KNOWLEDGE

Element name

Constructive-knowledge material

Legal question

What facts may bear on what the employer could reasonably have been expected to know?

Analysis status

Raw value

insufficiently_evidenced

Label

Insufficiently Evidenced

Explanation

The frozen element state remains insufficiently evidenced.

Qualification code

element_status:insufficiently_evidenced

Analysis confidence

Raw value

low

Label

Low

Explanation

Confidence is the frozen analytical confidence ceiling recorded by the engine. It is not a probability of legal success, a probability that a fact is true, or a source-credibility score.

Qualification code

confidence:low

Established matters

None recorded in the frozen report projection.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: What facts may bear on what the employer could reasonably have been expected to know?

Legal significance

Long-term absence, rehabilitation activity, insurer/OH involvement and other available information may be relevant to what the employer could reasonably have been expected to know or investigate.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the factual material potentially relevant to constructive knowledge. The current record may identify circumstances capable of supporting a constructive-knowledge argument without determining the legal standard. The presence of warning signs or available records does not itself establish constructive knowledge.

Linked direct finding IDs

Not recorded in the frozen report projection.

Linked higher-order finding IDs

11111111-1111-4111-8111-111111111101

Element ID

EK-DISADVANTAGE-KNOWLEDGE

Element name

Knowledge of relevant disadvantage

Legal question

Where legally relevant, what evidence addresses whether the employer knew or could reasonably have been expected to know of the relevant disadvantage?

Analysis status

Raw value

insufficiently_evidenced

Label

Insufficiently Evidenced

Explanation

The frozen element state remains insufficiently evidenced.

Qualification code

element_status:insufficiently_evidenced

Analysis confidence

Raw value

low

Label

Low

Explanation

Confidence is the frozen analytical confidence ceiling recorded by the engine. It is not a probability of legal success, a probability that a fact is true, or a source-credibility score.

Qualification code

confidence:low

Established matters

None recorded in the frozen report projection.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: Where legally relevant, what evidence addresses whether the employer knew or could reasonably have been expected to know of the relevant disadvantage?
- The identified material evidential gap remains unresolved on the current mapped record.

Legal significance

Evidence communicating travel difficulty, fatigue, anxiety, working limitations or adjustment need may be relevant to knowledge of the particular disadvantage relied upon.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the employer's awareness of the particular work-related disadvantage. The record may support provisional analysis of what difficulties or disadvantages were communicated to CACI. Knowledge of a health condition does not automatically establish knowledge of every particular disadvantage.

Linked direct finding IDs

Not recorded in the frozen report projection.

Linked higher-order finding IDs

Not recorded in the frozen report projection.

Linked gap IDs

Not recorded in the frozen report projection.

Low

Explanation

Confidence is the frozen analytical confidence ceiling recorded by the engine. It is not a probability of legal success, a probability that a fact is true, or a source-credibility score.

Qualification code

confidence:low

Established matters

None recorded in the frozen report projection.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: What does the claimant assert the employer knew, and what evidence independently supports or limits those assertions?

Legal significance

The claimant's assertions identify the knowledge case being advanced and the propositions requiring corroboration or limitation analysis.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the claimant's asserted account of what the employer knew. The current record may describe the claimant's asserted knowledge case while preserving its status as party evidence or source assertion. A claimant assertion establishes that the assertion was made, not that the employer in fact possessed the asserted knowledge.

Linked direct finding IDs

Not recorded in the frozen report projection.

Linked higher-order finding IDs

Established matters

None recorded in the frozen report projection.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: What does the respondent admit, deny or put in issue about knowledge?

Legal significance

Respondent admissions, denials and pleaded positions are relevant to identifying what aspects of knowledge are accepted or put in issue.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the respondent's position on employer knowledge. The current record may identify the respondent's pleaded or documented stance without treating that stance as factual truth. A respondent denial or admission is evidence of its position and must be assessed alongside the wider record.

Linked direct finding IDs

Not recorded in the frozen report projection.

Linked higher-order finding IDs

Not recorded in the frozen report projection.

Linked gap IDs

Not recorded in the frozen report projection.

11111111-1111-4111-8111-111111111101

Element ID

EK-UNRESOLVED

Element name

Unresolved knowledge propositions

Legal question

Which propositions about employer knowledge remain disputed or inferential on the current evidence?

Analysis status**Raw value**

insufficiently_evidenced

Label

Insufficiently Evidenced

Explanation

The frozen element state remains insufficiently evidenced.

Qualification code

element_status:insufficiently_evidenced

Analysis confidence**Raw value**

low

Label

Low

Explanation

Confidence is the frozen analytical confidence ceiling recorded by the engine. It is not a probability of legal success, a probability that a fact is true, or a source-credibility score.

Qualification code

confidence:low

Established matters

None recorded in the frozen report projection.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: Which propositions about employer knowledge remain disputed or inferential on the current evidence?

Legal significance

Unresolved knowledge propositions identify the factual boundaries that prevent a stronger legal analysis of actual or constructive knowledge.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the unresolved scope and content of employer knowledge. The current record should preserve uncertainty over information, recipients or timing that M4 has not resolved. M5 must not fill unresolved knowledge questions by inference merely because the wider narrative would be coherent.

Linked direct finding IDs

confidence:low

Established matters

None recorded in the frozen report projection.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: When is each item of alleged employer knowledge said to have arisen and for which act, omission or period is it relevant?

Legal significance

Evidence of when information was received or awareness arose is relevant to whether knowledge existed at the time of the act, omission or period under examination.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the chronology of alleged employer knowledge. The current record may establish dates of communications or events while leaving the scope of knowledge at each date provisional. Chronology alone does not establish what was known or whether the legal knowledge test was met at the relevant time.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: Was the claimant disabled within the meaning of the Equality Act at the relevant time?

Legal significance

Evidence about the claimant's condition, duration and functional effects is relevant to the factual basis of the Equality Act disability question.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the factual basis of disability at the relevant time. The current evidential state may be used to describe the condition and functional effects shown by the record without deciding the statutory disability test. A diagnosis, sickness absence or reported impairment does not by itself amount to a final determination that the statutory disability definition is met.

None recorded in the frozen report projection.

Unresolved matters

- The mapped evidence does not fully resolve: Did the employer know, or could it reasonably have been expected to know, of the disability and relevant disadvantage?

- The identified material evidential gap remains unresolved on the current mapped record.

Legal significance

Information received, discussed or reasonably available to the employer may be relevant to actual or constructive knowledge of disability and the relevant disadvantage.

Frozen provisional analysis

The frozen evidential record provides partial factual support relevant to the factual basis for employer knowledge relevant to the adjustment duty, but material limitations remain. The current record may support provisional analysis of what health- or disadvantage-related information was available to relevant CACI personnel. General sickness awareness or rehabilitation involvement does not by itself establish knowledge of every diagnosis, functional effect or particular disadvantage.

Element ID

RA-WORKPLACE-CONTEXT

Element name

Relevant workplace context

Legal question

What provision, criterion or practice, physical feature, auxiliary-aid issue, arrangement or workplace circumstance is said to engage the adjustment duty?

Analysis status**Raw value**

insufficiently_evidenced

Label

Insufficiently Evidenced

Explanation

The frozen element state remains insufficiently evidenced.

Qualification code

element_status:insufficiently_evidenced

Analysis confidence**Raw value**

low

Label

Low

Explanation

Confidence is the frozen analytical confidence ceiling recorded by the engine. It is not a probability of legal success, a probability that a fact is true, or a source-credibility score.

Qualification code

confidence:low

Established matters

None recorded in the frozen report projection.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: What provision, criterion or practice, physical feature, auxiliary-aid issue, arrangement or workplace circumstance is said to engage the adjustment duty?

Legal significance

Evidence identifying workplace arrangements, requirements, physical circumstances or auxiliary-aid issues is relevant to defining the context in which an adjustment duty is said to arise.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the workplace context said to engage the adjustment duty. The record may identify the working arrangement or circumstance relied upon without determining its final statutory characterisation. A workplace circumstance being documented does not itself establish that it is a legally relevant PCP, physical feature or auxiliary-aid issue.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: What substantial disadvantage did the claimant experience in comparison with a person who was not disabled?

Legal significance

Evidence of functional difficulty, comparative impact or work-related barriers is relevant to the factual basis of the alleged disadvantage.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the factual basis of the alleged disability-related disadvantage. The current record may describe reported or documented difficulties and their work-related effects provisionally. Reported difficulty does not by itself establish statutory substantial disadvantage or the required comparison.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: What adjustment was proposed, requested, identified or otherwise reasonably available for consideration?

Legal significance

Evidence of proposed, requested or identifiable steps is relevant to determining what adjustments were available for consideration.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the existence and content of proposed or identifiable adjustments. The record may establish that a step such as home working, phased return or altered duties was proposed or discussed. The existence of a proposal does not establish that the step was effective, practicable or legally reasonable.

Linked direct finding IDs

confidence:low

Established matters

None recorded in the frozen report projection.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: What evidence bears on whether the proposed or identifiable adjustment was reasonable in the circumstances?
- The identified material evidential gap remains unresolved on the current mapped record.

Legal significance

Evidence concerning effectiveness, practicability, operational impact, cost, resources, trials and alternatives may be relevant to the reasonableness inquiry.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the factual considerations relevant to the reasonableness of a proposed adjustment. The current record may identify facts bearing on practicability or effectiveness while leaving the legal evaluation for a later merits stage. A proposal, request or non-implementation does not by itself establish that an adjustment was legally reasonable or unreasonable.

Linked direct finding IDs

Not recorded in the frozen report projection.

confidence:low

Established matters

None recorded in the frozen report projection.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: What did the employer do or fail to do in relation to the proposed or identifiable adjustment?
- The identified material evidential gap remains unresolved on the current mapped record.

Legal significance

Evidence of what the employer did, decided, implemented, refused or omitted is relevant to the factual basis of the alleged failure to take a step.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the employer's factual acts or omissions concerning the proposed adjustment. The record may establish particular decisions or omissions without characterising them as an unlawful failure. Non-implementation, refusal or delay does not by itself establish breach of the reasonable-adjustments duty.

Established matters

None recorded in the frozen report projection.

Supported matters

None recorded in the frozen report projection.

Not-supported matters

None recorded in the frozen report projection.

Source assertions

None recorded in the frozen report projection.

Unresolved matters

- No current M3 relevant evidence resolves the factual question: When did the alleged act or omission occur, and is any continuing conduct alleged?

Legal significance

Dates and periods of alleged acts or omissions are relevant to when the adjustment-related conduct occurred and to any later limitation analysis.

Frozen provisional analysis

The current mapped and assessed record is insufficiently evidenced for a secure provisional analysis of the chronology of adjustment-related acts, omissions and alleged continuing conduct. The current record may establish dates or periods while leaving their legal characterisation open. A sequence of events or ongoing consequences does not by itself establish conduct extending over a period.
